SUMMARY

AI-native product manager with 4+ years owning end-to-end ML product roadmaps at JD.com, one of China's largest e-commerce platforms. Proven track record shipping ML recommendation systems and generative AI features that drove **10% revenue growth**. Combines deep data analytics expertise (Python, R, SQL, Tableau) with rigorous project management practices — roadmapping, risk planning, and agile delivery — to translate complex ML outputs into responsible, measurable product experiences. Pursuing technical PM, data PM, or AI program management roles at product-led technology companies.

EDUCATION

Northeastern University, Silicon Valley Campus
Master of Science in Project Management

San Jose, CA
09/2025–Expected Dec 2026

University of Dundee

Master of Science in Management & International Human Resource Management

Scotland, U.K.
09/2019–06/2020

SKILLS

Product & Project Management: Product Roadmap, OKRs, PRD Development, Product Discovery, User Research, Customer Journey Mapping, Feature Prioritization, Backlog Management, Sprint Planning, Agile/Scrum, Waterfall, Change Management, Stakeholder Management, Project Initiation, Work Breakdown Structure (WBS), Earned Value Management (EVM), Cost Estimation, Budget Baseline, Resource Allocation, Schedule Development, Scope Management, Requirements Documentation, Bottleneck Mitigation, Scope Creep Mitigation

Risk, Quality & Governance: Risk Identification, Risk Analysis, Risk Response Planning, Quantitative & Qualitative Risk Assessment, Probabilistic Estimation, Risk Monitoring, Quality Planning, Quality Assurance, Quality Control, Statistical Process Control, Process Capability Analysis, Cost of Quality, Program Management, Portfolio Management, Strategic Alignment, Governance Structures, Enterprise Resource Allocation

Agile & Lean: Scrum, Rapid Prototyping, MVP, Continuous Value Delivery, Continuous Improvement, Lessons Learned

Business Analysis & Strategy: Business Need Assessment, Requirements Elicitation & Prioritization, Design Thinking, Value Proposition, Benefit Identification, Strategy Analysis, Organizational Change Leadership, Resistance Management, Consensus Building, Negotiation, Facilitation

Financial & Procurement: Capital Budgeting, Discounted Cash Flow, Break-Even Analysis, Cost of Capital, Contract Management, Vendor/Supplier Management, Procurement

AI & ML: LLM Product Integration, Prompt Engineering, Recommendation Systems, Personalization Engines, Generative AI, Predictive Modeling, A/B Testing, AI Evaluation Frameworks, Responsible AI, Human-in-the-Loop Design, ML Pipeline Management, MLOps, Computer Vision, Forecasting, Simulation, Optimization, Neural Networks, Decision Trees, Clustering, Random Forest, Naive Bayes, K-Nearest Neighbors, Logistic Regression, Regression Analysis

Data Analytics: Data Mining, Data Visualization, Statistical Analysis, Correlation Analysis, Multivariable Regression, Data Warehousing, Data Modeling, Data Structures, Performance Reporting, Dashboard Development

Programming & Tools: R, Python, SQL, Jira, Tableau, TensorFlow

Big Data & Cloud: Hadoop, Apache Spark, Azure, Cloud Computing, Serverless Computing

Languages: Mandarin (Native), English (Fluent)

EXPERIENCE

Senior Product Manager, JD.com Inc. (China's #2 e-commerce platform, \$600B+ annual revenue) Shanghai, China | 11/2022–05/2025

- Authored PRDs defining project scope, deliverables, and success metrics across 3 AI product lines (semantic search, personalization engine, LLM-powered generative content); aligned cross-functional teams on OKRs, model evaluation criteria, and acceptance standards across engineering, data science, and business stakeholders.
- Spearheaded initiatives to boost product visibility, user engagement, and customer acquisition through an AI-powered recommendation engine; designed model evaluation framework with precision/recall benchmarks and A/B holdout groups, driving a **10% increase in total revenue**.
- Planned and executed full-spectrum campaigns — online/offline events and live-streaming sessions — leveraging AI personalization workflows to amplify product exposure and improve user retention.
- Led cross-departmental collaboration across Ads, Data Analytics, Product, and Customer Service teams (10+ stakeholders) using sprint retrospectives, maintaining **100% on-time delivery** across all major quarterly releases.
- Leveraged data-driven insights via SQL analytics pipelines to iteratively refine strategies, optimizing user dwell time, new user growth, and conversion rates to drive **15%+ QoQ improvement** in key business targets.

Product Manager, Chongbang Group (China's largest retail mall operator, 130+ shopping centers) Shanghai, China | 10/2020–10/2022

- Devised and implemented tailored sales, advertising, and event strategies for 10,000+ tenant brands, significantly

boosting visibility and market share for signature products in the global marketplace and driving a **35% average increase in brand campaign reach**.

- Led cross-functional collaboration across Ads, Data Analytics, Product, Customer Service, and Engineering teams, streamlining communication to align on tenant growth objectives and resolve operational bottlenecks, reducing average merchant onboarding time by **30%**.
- Drove promotional campaigns for 10,000+ diverse brands using ML-based bid optimization and algorithmic budget allocation tools, delivering **20% profitability growth** for 1,000+ brands.
- Contributed to a **90% tenant renewal rate** and **10% profitability uplift** across the commercial ecosystem by deploying AI-assisted KPI dashboards with predictive churn modeling to optimize tenant performance and satisfaction.
