SUMMARY

AI-native product manager with 4+ years owning end-to-end ML product roadmaps at JD.com, one of China's largest e-commerce platforms. Proven track record shipping ML recommendation systems and generative AI features that drove **10% revenue growth**. Combines deep data analytics expertise (Python, R, SQL, Tableau) with rigorous project management practices — roadmapping, risk planning, and agile delivery — to translate complex ML outputs into responsible, measurable product experiences. Pursuing technical PM, data PM, or AI program management roles at product-led technology companies.

EDUCATION

Northeastern University, Silicon Valley Campus
Master of Science in Project Management

San Jose, CA
09/2025–Expected Dec 2026

University of Dundee

Master of Science in Management & International Human Resource Management

Scotland, U.K.
09/2019–06/2020

SKILLS

PM Skills: Product Roadmap, OKRs, PRD Development, Product Discovery, User Research, Customer Journey Mapping, Feature Prioritization, Backlog Management, Agile/Scrum, Sprint Planning, Stakeholder Management, Go-to-Market Strategy, MVP, Change Management, Scope Management, Risk Management, Program Management, Portfolio Management, Strategic Alignment, Cross-functional Leadership, Work Breakdown Structure (WBS), Earned Value Management (EVM)

AI & ML: LLM Product Integration, Prompt Engineering, Recommendation Systems, Personalization Engines, Generative AI, Predictive Modeling, A/B Testing, AI Evaluation Frameworks, Responsible AI, Human-in-the-Loop Design, ML Pipeline Management, MLOps, Computer Vision, Forecasting, Neural Networks, Decision Trees, Clustering, Random Forest, Logistic Regression

Data Analytics: Data Mining, Data Visualization, Statistical Analysis, Data Warehousing, Data Modeling, Performance Reporting, Dashboard Development

Programming & Tools: Python, R, SQL, Tableau, TensorFlow, Jira

Big Data & Cloud: Hadoop, Apache Spark, Azure, Cloud Computing, Relational Databases

EXPERIENCE

Senior Product Manager, *JD.com Inc. (China's #2 e-commerce platform, \$600B+ annual revenue)* Shanghai, China | 11/2022–05/2025

- Authored PRDs defining project scope, deliverables, and success metrics across 3 AI product lines (semantic search, personalization engine, LLM-powered generative content); aligned cross-functional teams on OKRs, model evaluation criteria, and acceptance standards across engineering, data science, and business stakeholders.
- Spearheaded initiatives to boost product visibility, user engagement, and customer acquisition through an AI-powered recommendation engine; designed model evaluation framework with precision/recall benchmarks and A/B holdout groups, driving a **10% increase in total revenue**.
- Planned and executed full-spectrum campaigns — online/offline events and live-streaming sessions — leveraging AI personalization workflows to amplify product exposure and improve user retention.
- Led cross-departmental collaboration across Ads, Data Analytics, Product, and Customer Service teams (10+ stakeholders) using sprint retrospectives, maintaining **100% on-time delivery** across all major quarterly releases.
- Leveraged data-driven insights via SQL analytics pipelines to iteratively refine strategies, optimizing user dwell time, new user growth, and conversion rates to drive **15%+ QoQ improvement** in key business targets.

Product Manager, *Chongbang Group (China's leading omnichannel retail platform, 130+ shopping centers)* Shanghai, China | 10/2020–10/2022

- Leveraged data-driven audience segmentation and AI-powered advertising tools to design tailored sales, advertising, and event strategies for 10,000+ brand partners, driving a **35% average increase in brand campaign reach** across global marketplace channels.
- Led cross-functional collaboration across Ads, Data Analytics, Product, Customer Service, and Engineering teams, streamlining communication to align on brand partner growth objectives and resolve operational bottlenecks, reducing average merchant onboarding time by **30%**.
- Drove promotional campaigns for 10,000+ diverse brands using ML-based bid optimization and algorithmic budget allocation tools, delivering **20% profitability growth** for 1,000+ brands.
- Contributed to a **90% brand partner renewal rate** and **10% profitability uplift** across the commercial ecosystem by deploying AI-assisted KPI dashboards with predictive churn modeling to optimize brand partner performance and satisfaction.
